

Flap Wheel with shaft

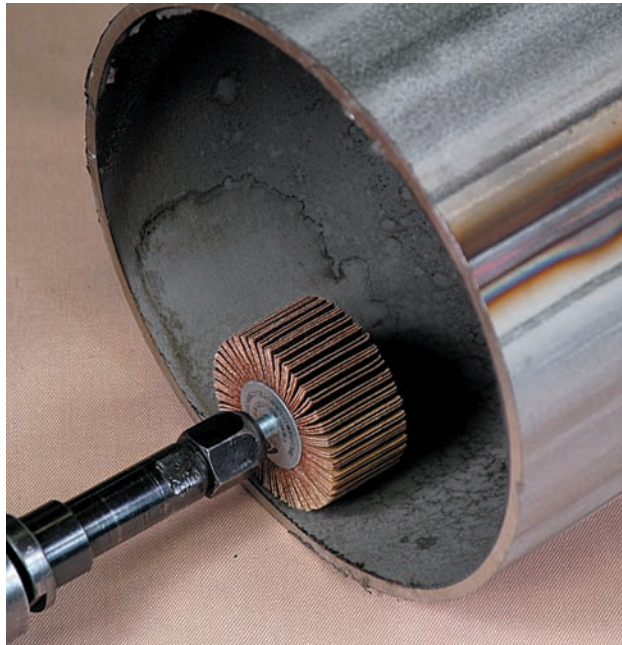

Applications

- Polishing inner surfaces of pipes
- Rounding edges, hole borders
- Deburring
- Removing burn marks after welding
- Polishing narrow secluded corners and curved surfaces

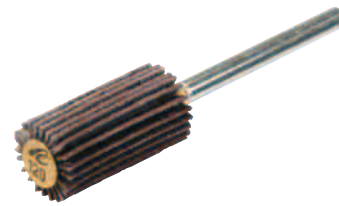

Flap Wheel

- The highly flexible wheel with a shaft is a standard product.
- Abrasive material is quickly discharged after being scraped, leaving the polishing power stably high.

Micro Flap

- Suited to smooth operations on fine gaps, with no axial runout under high-speed rotations.

Flap Wheel
